Endpoints

1. `/customers`

GET: Get all customers with their custom prices

POST: Create a new customer

Body:

```
{  
  
  "name": "Toko A"  
  
}
```

PUT: Update existing customer

Body:

```
{  
  
  "id": 1,  
  
  "name": "Toko B"  
  
}
```

DELETE: Delete a customer

Body:

```
{  
  
  "id": 1  
  
}
```

2. /customer-price

GET: Get all customer prices

POST: Add a custom price

Body:

```
{  
  
  "customerId": 1,  
  
  "variantId": 2,  
  
  "price": 100000  
  
}
```

PUT: Update a custom price

Body:

```
{  
  
  "id": 1,  
  
  "price": 120000  
  
}
```

DELETE: Delete a custom price

Body:

```
{  
  
  "id": 1  
  
}
```

3. /primary-products

GET, POST, PUT, DELETE

Fields:

```
{  
  
  "id": number,  
  
  "name": string  
  
}
```

4. /product-variant

GET, POST, PUT, DELETE

Fields:

```
{  
  
  "id": number,  
  
  "variantName": string,  
  
  "primaryProductId": number  
  
}
```

Validation via Zod

All POST & PUT requests use Zod schema validation.

Error format:

```
{  
  
  "error": {  
  
    "field": ["message"]  
  
  }  
  
}
```

Notes

- All endpoints are under /api

- Body should be sent as raw JSON
- createdAt is auto-generated
- Restart server after editing Prisma schema
